Patient-reported symptom summary

Generated 2026-10-25

Not a diagnosis. Prepared by the patient with Navira.

SYNTHETIC DEMO DATA: not a real patient.

In my words

Reported by the patient

"Mujhe do saal se periods ke time bahut zyada pet dard hota hai, kabhi kabhi college nahi ja paati, month mein do-teen din. Painkiller se thoda aaram milta hai but pura nahi."

Timeline

Reported by the patient

Onset: Present for about 2 years (approx.) | Pattern: comes during periods | Frequency: unknown

Symptoms

Reported by the patient

Symptom	Severity	Cycle relation	Since	Confirmed
Pelvic pain	8/10	during periods	about 24 months	Yes
Pain during or after sex	unknown	unknown	unknown	Yes
Pain with bowel movements	unknown	during periods	unknown	Yes

Impact on daily life

Reported by the patient

- Sometimes misses classes, about 2–3 days a month

What I have tried

Reported by the patient

- Painkillers: partial relief

Features commonly considered in evaluation

Generated by Navira from confirmed answers. Not a diagnosis.

- Persistent or recurrent pelvic pain reported (duration: 24 months). [ENDO-01; NICE NG73 Endometriosis 1.1]
- Period-related pain with functional impact reported (misses classes; days per month: 2–3). [ENDO-02; NICE NG73 Endometriosis / ESHRE 2022 1.1]
- Pain during or after sex reported (depth not specified). [ENDO-03; NICE NG73 Endometriosis 1.1]
- Bowel or urinary pain around periods reported. [ENDO-04; NICE NG73 Endometriosis 1.1]
- Limited relief from first-line painkillers reported (partial). [ENDO-06; ESHRE Endometriosis Guideline 2022]

Not yet known

Generated by Navira from confirmed answers. Not a diagnosis.

- Urinary pain or burning
- Heavy bleeding or clots
- Any difficulty conceiving
- Family history of similar problems
- Tests or scans already done, and what you were told

Questions I would like to discuss

Reported by the patient

1. Which tests or referrals would help clarify what is behind these symptoms?
2. Painkillers only help partly. What other options are there?
3. Could the pain during sex be connected to my other symptoms?
4. The pain affects my daily life. What can help while we find out more?
5. Is there anything from the "not yet known" list that you would like me to track before the next visit?
